AGENDA ITEM: Delivering on the Academic Mission of the Medical School

[ ] Review  [ ] Review + Action  [ ] Action  [X] Discussion

This is a report required by Board policy.

PRESENTERS: Brooks Jackson, Vice President for Health Sciences and Dean of the Medical School
Mark Rosenberg, Vice Dean for Education and Academic Affairs, Medical School

PURPOSE & KEY POINTS

The purpose of this item is to discuss the progress in advancing medical education at the University and training the next generation physicians in Minnesota. The discussion will include:

- National rankings and local impact.
- Outcomes from our Duluth campus.
- Tuition.
- Efforts to increase diversity.
- Plans to increase enrollment.
- Innovations in educating medical students.
- Wellbeing of students.
- Faculty development efforts.

BACKGROUND INFORMATION

The Board previously discussed this topic at the following meetings:

- December 2016: Progress Update on Medical School Strategic Plan – Board of Regents
- February 2016: Medical School Update – Academic & Student Affairs
- May 2015: Medical School Strategic Plan: Report on Scholarship and Research Metrics – Special Committee on Academic Medicine
Delivering on the Academic Mission of the Medical School

to
fixed outcome: variable time

SPECIAL THEME ARTICLE

Shifting Paradigms: From Flexner to Competencies
Carol Carrascio, MD, Susan D. Williford, MD, Robert Englander, MD, MPH,
Kevin Freyett, MD, and Christina Martin, PhD

Abstract
Realizing medical education is on the brink of a major paradigm shift from time-centric and process-based to competency-based education and measurement of outcomes, the authors examined the existing medical literature to provide practical insight into how to accomplish full implementation and evaluation of the new paradigm. They searched Medline and the Educational Innovation Information Clearinghouse from the 1980s until the present, reviewed the titles and abstracts of the 409 articles the search produced, and chose 68 relevant articles for full review.

The authors found that in the 1970s and 1980s, much attention was given to the need for and the development of professional competencies for many medical disciplines. Little attention, however, was devoted to defining the benchmarks of specific competencies, how to attain them, or the evaluation of competencies. Lack of evaluation strategies was likely one of the forces responsible for the 20- to 30-year lag between initiation of the movement and widespread adoption. Lessons learned from past experiences include the importance of strategic planning and faculty and learner buy-in for defining competencies. In addition, the benchmarks for defining competency and the thresholds for attaining competency must be clearly defined. The development of appropriate assessment tools to measure competency remains the challenge of this decade, and education must be responsible for studying the impact of this paradigm shift to determine whether its ultimate effect is the production of more competent physicians.

Thank You, Preceptors
FOR TEACHING OUR FUTURE PHYSICIANS!

From the MHA
"Physicians who serve as preceptors demonstrate commitment to the future of the medical profession. We want to say thank you to those physicians who take the time to help shape our next generation of physicians." - DAVID YOUNG, MD, PRESIDENT

From the U of M Medical School
"The work of preceptors has a huge impact on our students as they learn about clinical medicine and what it means to be a physician. We are so appreciative of their time and effort." - JAYA MUKHERJEE, MD, VICE DEAN FOR EDUCATION

From medical students
"The numerous hours spent teaching have had an invaluable effect on me.
"Thank you to all preceptors for everything you do."
"I'm so fortunate to have been educated by my preceptor."
"Thank you for doing the work you do so well."
"My preceptor has shown kindness, generosity, intellect, and compassion — things I hope to emulate every day."
"I never realized how grateful a patient can be when you take an interest in their life."
"Thank you for sharing your patience with me."

AGENDA ITEM: Update on Student Mental Health

☐ Review  ☐ Review + Action  ☐ Action  ☒ Discussion

☐ This is a report required by Board policy.

PRESENTERS: Gary Christenson, Chief Medical Officer, Boynton Health
Sue Wick, Professor, Plant Biology and Biology Teaching & Learning, College of Biological Sciences

PURPOSE & KEY POINTS

The purpose of this item is to discuss student mental health on the Twin Cities campus and receive an update on the impact of additional funding for student mental health services.

Boynton Health's Mental Health Clinic and Student Counseling Services are the designated resources for student mental health clinical services on the Twin Cities campus. Demand for service at both sites has steadily increased, resulting in student waitlists for access to therapy and counseling services. Additional funds were invested through the student service fee, Office of the Provost, and the President’s Office for FY16 and FY17 in an effort to expand staff capacity with the goal of eliminating waitlists.

This item also includes an update on demands for student mental health services and status of waitlists; addresses plans for future programming; and provides an overview of the Taskforce on Student Mental Health.

Provost-FCC Joint Task Force on Student Mental Health

Sue Wick, Professor
Plant and Microbial Biology,
Biology Teaching and Learning
Co-chair, Provost-FCC Joint Task Force on Student Mental Health
Why establish a task force?

What hasn’t already been addressed in the area of student mental health?
Why establish a task force?

What hasn’t already been addressed in the area of student mental health?

wellness → unmanaged stress → serious clinical concerns
Taskforce Charge

Review various reports and resources on student mental health on our campus and provide the FFC chair and the Provost with insights and observations relevant to the role of faculty and instructors.

Develop strategies for:

- engaging University faculty and instructional staff ... (and) fostering a sense of ownership of the institutional need to find solutions;
- educating University faculty and instructional staff about the status of and resources for student mental health on the Twin Cities campus;
- training faculty and instructional staff to recognize and respond to behaviors that signal student mental health concerns; and
- encouraging University faculty and instructional staff contributions to positive student-mental-health environments and to the reduction of stigma associated with mental health problems.
Taskforce Charge, continued

Develop action steps related to these strategies and to the recommendations from the 2016 Provost’s Committee on Student Mental Health report.

Review the original charge and work of the Provost’s Committee on Student Mental Health and suggest to the Provost the committee’s future composition and direction.
Taskforce Membership

14 members, some with dual functions:

- 6 faculty/instructional staff
- 4 students/postdocs
- 5 staff in administrative/service roles
- 2 co-chairs + 1 rep from Provost’s office
The task force recommendations address

• The need for instructors to acknowledge their role in student mental health

• Best practices for instructors to prevent unnecessary stress in interactions with students in class or individually

• What instructors need to know to recognize and respond effectively to student mental distress

• What units need to do to support instructors

• How the University leadership can support best practices
AGENDA ITEM:  Update on the Greek Task Force Recommendations

☐ Review  ☐ Review + Action  ☐ Action  ☒ Discussion

☐ This is a report required by Board policy.

PRESENTERS:  Maggie Towle, Associate Vice Provost for Student Life and Director, Student Unions and Activities, Office for Student Affairs
Lamar Hylton, Assistant Vice Provost for Student Life, Office for Student Affairs
Lynn Swon, President, Minnesota Greek Alumni Council

PURPOSE & KEY POINTS

The purpose of this item is to discuss the implementation of recommendations from the 2012 Greek Community Strategic Task Force. The committee will also receive an overview of Greek life at the University.

BACKGROUND INFORMATION

In March 2012, President Kaler formed a Greek Community Strategic Task Force and charged the group to develop a “sustainable and robust relationship between the University and the Greek community.” The task force issued a report outlining 47 recommendations in December 2012. The Office for Student Affairs, the University of Minnesota Alumni Association, Fraternity and Sorority Life, and the Minnesota Greek Alumni Council have been working to implement those recommendations.
In 2012, President Kaler announced the formation of the Greek Community Strategic Task Force (GCSTF). The Task Force charge was to develop a plan for a “sustainable and robust relationship between the University and the Greek Community.” Based on a thorough assessment, three work teams identified a range of recommendations around Alumni Engagement, Greek Housing, and enhancing the Greek Student Experience.

One recommendation, completed in May 2013, was to establish the Minnesota Greek Alumni Council (MGAC) to work with University leadership and staff as well as Greek Student leaders. A mission to help grow and strengthen the Greek community has been adopted by the Greek Alumni Council. After three years, this Progress Report reviews our shared progress against the detailed 2012 GCSTF recommendations.

We plan to continue this work and engage more Greek alumni, improve and expand current and future Greek student housing, and support the Greek student leaders’ initiatives.

In Spring 2016 we can report that the Greek membership growth goal set for 2018 has been surpassed. At only 6% in 2011, we now have nearly 10% of all undergraduates at the University of Minnesota as Interfraternity and Panhellenic Greek chapter members. You would have to go back to 1981 to find a similar peak and IFC/PHC membership of 3100. As Greeks remain the largest student cohort on campus, we are aiming for future growth to match the Big-Ten average of 13% of undergraduates.
Christopher Wright
Office of the Dean of Students
University of Minnesota
September 30, 2016

Could you please send me the most up to date version of the MGA.pdf that you previously had sent to me? I have a few questions that need clarification.

In the past two years, MGAC has reached out to many Greek Alumni through events, our monthly newsletters and online communications and new Chapter House Corporation and Chapter Advisor directed programs. Our Greek Alumni Leadership database now has over 500 members who have attended and been involved in helping support their own chapters and the University of Minnesota Greek system. With many new programs and another All-Greek Reunion planned for Fall 2016 Homecoming, we are excited about continued growth of Greek Alumni engagement.

1. Establish Greek alumni group

100%

The Minnesota Greek Alumni Council was established as a 501c3 in May 2013

2. Add Greek affiliation in DMS

11%

Estimated 14,000 e-mailable Greeks added so far, including recent Greek graduates.

New programs will add more.

• IAMGREEK link sent to 10 Greek alumni club leaders to distribute

• Homecoming Greek Reunion 2016

3. Communications plan for Greek alumni (Three-pronged)

100%

- Ongoing monthly newsletters to Greek House Corporation leaders

- Established Facebook page, MGAC website, and linked in page- ongoing updates needed

- Quarterly newsletters to broad DMS Greek email list – began in 2016

4. Develop a written history of the Greek system at the University of Minnesota

0

NOT FUNDED

5. Greek alumni engagement

100%

• Engage students in Greek alumni community before they graduate

  » First Annual Senior Salute/Alumni Event, April 2016

• Create special events to engage and inspire Greek alumni

  » All Greek Reunion, Fall 2014

  » First Alumni/Student Networking Event, November 2015

  » MGAC committee engagement – begun

  » New: Homecoming Greek Reunion event planned for 2016

6. Greek alumni networking and mentoring of students

50%

• 1st Annual Networking Event, November 2015

• Mentoring program in development for 2016-2017

7. Strengthen chapter governance and alumni volunteer training and shared best practices

50%

• Chapter House Corporation Leadership began shared meetings once per semester: PHC chapters since 2013, and IFC began in Spring 2015.

• New: House Safety Training – August 2016

8. Identify and recruit Greek faculty and staff

0

Not adopted as priority

9. Panhellenic extension

50%

• First PHC Extension completed: Chi Omega (ΧΩ), Fall 2013 and Phi Mu (ΦΜ), Fall 2016

• Future Sorority Extension has a barrier related to Greek housing availability.

10. Create a Greek job board

0

Not adopted as priority

Initiative One: Connect and Activate Greek Alumni. In the past two years, MGAC has reached out to many Greek Alumni through events, our monthly newsletters and online communications and new Chapter House Corporation and Chapter Advisor directed programs. Our Greek Alumni Leadership database now has over 500 members who have attended and been involved in helping support their own chapters and the University of Minnesota Greek system. With many new programs and another All-Greek Reunion planned for Fall 2016 Homecoming, we are excited about continued growth of Greek Alumni engagement.
IN Initiative Two: Support Greek housing improvement and expansion. Across the country, Fraternities and Sororities are the largest non-profit providers of student housing, besides Universities and colleges themselves. At the University of Minnesota Greek houses today have over 1000 beds for undergraduates making Greek Housing important to students, alumni and the University. The 2012 Greek Task Force identified a range of recommendations to support existing Greek housing improvement and expansion as well as new chapter housing development in support of University Greek system growth.

1. Optimize 17th Avenue Residence Hall opportunity to add 200 Greek beds and create Greek Living Learning Community at 17th Ave Residence Hall

<table>
<thead>
<tr>
<th>Year</th>
<th>Total Beds</th>
</tr>
</thead>
<tbody>
<tr>
<td>2013</td>
<td>102</td>
</tr>
<tr>
<td>2014</td>
<td>117</td>
</tr>
<tr>
<td>2015</td>
<td>97</td>
</tr>
<tr>
<td>2016</td>
<td>181</td>
</tr>
</tbody>
</table>

- Fraternity Early Recruit Wing (New 2016)
- Other Fraternity Temp Housing/ Beds (AGR, FH)
- SAE Lease and Member Beds
- Sorority Upperclassmen (Chi Omega Semester 2 - 2014)
- Greek Unity House (Renamed LLC for 2016)
- Pillar House LLC*

- Occupancy, including Greek Unity House Living Learning Community, has grown substantially since Fall 2013 — projected to 90% of goal.
- 2015-16 had 65% of Pillar House join Greek chapters
- Chapters member blocks as needed and new Greek programs, focused on incoming students added
- OFSL is developing Greek experience programing working with community advisors

2. Define incubator space to grow Greek chapters and meeting space for Greeks

- Chi Omega (XΩ) 2013 – Ongoing
- Theta Chi (ΘΧ) 2013 – 2016
- Phi Mu (ΦΜ) Fall 2016 Launch

- Two incubator spaces leased at 17th Avenue RH since fall 2013
- Two new Sorority chapters and one Fraternity chapter have been established
- Permanent Greek Meeting space leased – room 116

3. Offer low cost, long term financing vehicle to fund improvements to existing Greek housing

- 34% Loan program launched June 2015
- Five Greek Chapters are receiving loans this summer utilizing 34% of the available $3 million
- Four additional Greek chapters are in the planning stage

4. Reduce zoning ordinance restrictions (on existing Greek properties)

- 50% 2014 Greek zoning recommended changes developed
- 2015 City Council members and Neighborhood input
- Summer 2016 approval targeted – MHNA and Minneapolis City Council

5. Acquisition of property — Greek housing or land bank – No Progress to Date

6. Create a task force to develop a new Greek commons project – No Progress to Date
**INITIATIVE THREE: Enrich and support the Greek student experience.** We now have a thriving Greek community of over 3000 Greek student members within IFC and Panhellenic chapters. The Office of Fraternity & Sorority Life (OFSL) and OSA leadership and staff and MGAC regularly work together to support the Greek student leaders’ priorities and initiatives. Input and requests from Greek student leaders often cover broad areas, such as improving overall marketing and messaging, identifying ways for all IFC chapters to recruit more effectively and offering stronger member and alumni training programs. Some of the current student needs are similar to those identified in the 2012 GCSTF recommendations and others have evolved in the past 4 years. While the OFSL has been working with all 4 student councils, (IFC, Panhellenic, National Pan-Hellenic and Multicultural Greek chapters) MGAC has not yet engaged in any efforts with the broader Greek alumni community. This will be one of several important initiatives in 2016-17 as we move forward and add further recommendations to support Greek growth and students’ leadership.
1. Strengthen and build the Greek student community

Greek student community continues to have higher grade point averages and graduation rates than overall undergrads.

- Access to Leadership opportunities and experiences
  - IFC/PHC Councils and/or Chapter Presidents attend many educational programs and sessions including: January Leadership Retreat, Assoc. of Fraternal Leadership & Values Central Conf., Multicultural Greek Leadership Weekend and OFSL hosts monthly Presidents meetings.
  - Participation in service and other campus or community based projects
    - 25%
      » Student Leaders involved in Greek Zoning and Neighborhood/City governance meetings

- Build connections with Alumni to help lead to internships and career opportunities
  - 50%
    » Established annual Student/Alumni Networking event (Nov. 2015) and Spring Senior Salute event
    » Greek Mentor program in development for Fall 2016 launch

- Enhance messaging about membership in the Greek Community – ongoing
  - 100%
    » Student-managed communications have expanded: BeGreek.org, at Orientation and Welcome Week
    » Develop overall Greek value proposition (and key messages)
    » NEW: Greek Marketing Strategy Task Force (Alumni, Students, University Staff) – Summer 2016

2. Establish Greek growth targets and make needed enhancements to recruiting process to meet those

- Goal of 9% of undergrads by 2017 achieved in 2015-16
  - PERCENTAGE OF UOfM STUDENTS WHO ARE GREEK MEMBERS
  - 15%
    » Recruitment Task Force begun 2013, but failed to agree on needs
    » Sorority recruitment defined by national PHC and considered effective, no changes needed
    - NEW: Fall 2016 initiative with IFC-only Early and Formal Recruitment improvement focus

3. Programming for Greek members to ensure consistent awareness of responsibilities and privileges of membership

- Greek Life: ‘live-in’ Adult Staff
  - 36%
    » Adult Director in 12 of 33 residential facilities; Adults staff is encouraged but decisions and financing is by House Corporations
    » Training beginning Aug. 2016 on Safety and other University resources

- Add alcohol education for all Greeks
  - 50%
    » Required on-line AlcoholEDU

- Add a values-based new member seminar
  - 50%
    » Chapters conduct various Member Development programs based on values.
    » Work with Sororities on role played in overall risk management scenarios
      » All PHC chapters have National risk policies and PHC has hosted mock-trials to educate members on community risks
    » Create a Fraternity & Sorority Ethics Board
      » OFSL is no longer serving in a conduct related capacity, now an advisory role only
      » NEW: Twin Cities Group Conduct Code process affecting Fraternity and Sorority groups under development
4. Add staffing & infrastructure to move recommendations forward and find office space for Greek leadership councils

- Fraternity & Sorority Life added one staff position – July 2015
- Room 116 at 17th Avenue for Greek use only

5. 17th Avenue Residence Hall — Greek Living & Learning Community

- Alumni and students survey work improved language for LLC, renamed Greek Unity House for Fall 2016
- Now promoting Greek Unity House to all entering students and providing Greek student mentors
- OFSL identifying more effective programming for Greek Unity House

6. Improve Greek community operating effectiveness by developing information systems to track and monitor performance

- Comprehensive data-rich means of evaluating the Greek Student Experience
- Implement a Greek Life survey to be conducted bi-annually
  » OFSL has a coordinated assessment plan, qualitative and quantitative, in development – no MGAC involvement to-date
- Track Greek involvement
  » The “Experience Record” through the new CollegeLink system will launch in Academic Year 2016-17
- Move forward with Registration Hold program
  » Implemented

AGENDA ITEM: Consent Report

[ ] Review  [X] Review + Action  [ ] Action  [ ] Discussion

[X] This is a report required by Board policy.

PRESENTERS: Karen Hanson, Executive Vice President and Provost

PURPOSE & KEY POINTS

1. To seek Board approval of the 2017 Postsecondary Planning: Joint Report to the Minnesota Legislature.

This is the eighth report produced jointly since 2001 by Minnesota State and the University of Minnesota, as required by the Minnesota Session Laws 2003, Regular Session, Chapter 133, Article 1, Section 7. The report reflects the long-term, ongoing, effective working relationship between the two systems to develop and coordinate joint post-secondary programs in the Twin Cities and throughout Minnesota.

Included in the report is information on collaborative programs between the two systems; program duplication; credit transfer; and college readiness and assistance to underprepared students.

2. To seek Board approval of new academic programs and program additions, program deletions and discontinuations, and/or program changes, as outlined below.

I. Request for Approval of New Academic Programs

- Carlson School of Management (Twin Cities campus)—Create Doctor of Business Administration
- College of Science and Engineering (Twin Cities campus)—Create Post-baccalaureate certificate in Data Science and deliver online
- Medical School (Twin Cities campus)—Create fellowship in Epilepsy
- College of Liberal Arts (Duluth campus)—Create undergraduate minor in Digital Writing, Literature and Design
- Labovitz School of Business and Economics (Duluth campus)—Create undergraduate minor in Sustainable Business and Organization
- The Morris campus—Create B.A. degree and undergraduate minor in Medieval Studies

II. Request for Approval of Changed Academic Programs

- College of Education and Human Development (Twin Cities campus)—Create sub-plan in Prevention Science within the M.A. degree in Family Social Science
Carlson School of Management (Twin Cities campus)—Deliver the Master of Business Taxation online

College of Food, Agricultural and Natural Resource Sciences (Twin Cities campus)—Move the academic home of the M.S. degree in Agricultural Education from The College of Education and Human Development to the College of Food, Agricultural and Natural Resource Sciences

The Morris campus—Change the name of the B.A. degree and undergraduate minor in American Indian Studies to Native American and Indigenous Studies

III. Request for Approval of Discontinued Academic Programs

- Swenson College of Science and Engineering (Duluth campus)—Discontinue the B.S. degree in Cell and Molecular Biology
- College of Education and Human Service Professions (Duluth campus)—Discontinue the undergraduate certificate in Autism Spectrum Disorders
- College of Liberal Arts (Duluth campus)—Discontinue the undergraduate minor in Information Design

BACKGROUND INFORMATION

- Minnesota Session Laws 2003, Regular Session, Chapter 133, Article 1, Section 7. POSTSECONDARY SYSTEMS: As part of the boards’ biennial budget requests, the board of trustees of the Minnesota state colleges and universities and the board of regents of the University of Minnesota shall report to the legislature on progress under the master academic plan for the metropolitan area. The report must include a discussion of coordination and duplication of program offerings, developmental and remedial education, credit transfers within and between the postsecondary systems, and planning and delivery of coordinated programs. In order to better achieve the goal of a more integrated, effective, and seamless postsecondary education system in Minnesota, the report must also identify statewide efforts at integration and cooperation between the postsecondary systems.

- Academic program proposal review and approval is governed by University of Minnesota Policy 2.2.4: Review of Proposals for New, Changed, and Discontinued Academic Programs. Approval by the Board of Regents is required for the establishment of new academic programs; addition of formal tracks and of new sites for existing academic programs; discontinuance/merger of existing programs; and changes in program titles/degree designation.

PRESIDENT’S RECOMMENDATION

The President recommends approval of the Consent Report.
POSTSECONDARY PLANNING:

A JOINT REPORT
TO THE MINNESOTA LEGISLATURE

Minnesota Session Laws 2003, Regular Session, Chapter 133, Article 1, Section 7. POSTSECONDARY SYSTEMS
As part of the boards' biennial budget requests, the board of trustees of the Minnesota State and the board of regents of the University of Minnesota shall report to the legislature on progress under the master academic plan for the metropolitan area. The report must include a discussion of coordination and duplication of program offerings, developmental and remedial education, credit transfers within and between the postsecondary systems, and planning and delivery of coordinated programs. In order to better achieve the goal of a more integrated, effective, and seamless postsecondary education system in Minnesota, the report must also identify statewide efforts at integration and cooperation between the postsecondary systems.
Executive Summary

The 2017 Postsecondary Planning Report is the eighth report produced jointly by Minnesota State and the University of Minnesota, as required by the Minnesota Session Laws 2003, Regular Session, Chapter 133, Article 1, Section 7.

The report reflects the long-term, ongoing, and effective working relationship between the two systems to develop and coordinate joint postsecondary programs in the Twin Cities and throughout Minnesota.

Collaborative Programs

- During the past 16 years, the number of formal academic collaborations and partnerships between the University of Minnesota and Minnesota State has grown from 60 to over 150 programs and services.
- Increasingly sophisticated library and information technology resources are jointly available to University of Minnesota and Minnesota State students and citizens throughout the state; these joint resources are heavily used for learning and research.

Program Duplication

- There is very little duplication of programs in the metropolitan area between the University of Minnesota and the Minnesota State. Among the over 1,800 degree programs available at the University of Minnesota–Twin Cities and metropolitan-area offerings of Minnesota State, only 33 are similar enough in content to be considered duplicative, and most of these are in high-demand fields.
- Both systems monitor and evaluate their own programs for possible duplication and overlap.

Credit Transfer

- Effective credit transfer policies are a central component of the cooperation and collaboration between Minnesota State and the University of Minnesota.
- The two systems have established and improved cooperative inter-system transfer programs, including articulated transfer standards, the Minnesota Transfer Curriculum, and electronic transfer data software systems.
- All institutions in the Metro Alliance of Minnesota State and the University of Minnesota offer all or part of the Minnesota Transfer Curriculum.

College Readiness and Under-Prepared Students

- The two systems, through the P–20 Education Partnership and other alliances and programs, work cooperatively to meet the needs of under-prepared students and prepare increasingly diverse student populations and all K–12 students for postsecondary education opportunities.
I. INTRODUCTION

Minnesota State and the University of Minnesota are pleased to submit this joint report on postsecondary planning, as required by the Minnesota Session Laws 2003, Regular Session, Chapter 133, Article 1, Section 7.

The 2017 report responds to the topics requested by the Minnesota Legislature and reflects the extensive and ongoing collaboration between the two systems providing public higher education in Minnesota. While individual cooperative initiatives have been in operation for decades, the higher education systems (and other primary stakeholders) have solidified their commitment to develop and coordinate joint postsecondary programs for the metropolitan area through formal agreements.

The 2017 report was produced cooperatively by an inter-system working group comprising representatives from the Office of the Executive Vice President and Provost at the University of Minnesota and from the Office of the Vice Chancellor for Academic and Student Affairs at Minnesota State.

Mission Differentiation

Collaboration between Minnesota State and the University of Minnesota is grounded in the distinct and different missions of the two systems, as established by State Statute 135A.052: Postsecondary Missions:

Subdivision 1. Statement of missions. The legislature recognizes each type of public postsecondary institution to have a distinctive mission within the overall provision of public higher education in the state and a responsibility to cooperate with each other. These missions are as follows:

1. the technical colleges shall offer vocational training and education to prepare students for skilled occupations that do not require a baccalaureate degree;
2. the community colleges shall offer lower division instruction in academic programs, occupational programs in which all credits earned will be accepted for transfer to a baccalaureate degree in the same field of study, and remedial studies, for students transferring to baccalaureate institutions and for those seeking associate degrees;
3. consolidated community technical colleges shall offer the same types of instruction, programs, certificates, diplomas, and degrees as the technical colleges and community colleges offer;
4. the state universities shall offer undergraduate and graduate instruction through the master’s degree, including specialist certificates, in the liberal arts and sciences and professional education; and
5. the University of Minnesota shall offer undergraduate, graduate, and professional instruction through the doctoral degree, and shall be the primary state supported academic agency for research and extension services.
Collaboration History

Minnesota State and the University of Minnesota have a long history of collaboration. Many of the partnerships between the two systems and their institutions pre-date the 2003 legislative requirement for this planning report as well as the merger of the state colleges and universities systems.

Efforts over the past two decades include joint planning to leverage limited financial resources, coordinating upper-division programs in the Twin Cities, responding to Twin Cities metropolitan area growth, improving credit transfer between the two systems statewide, and reaching traditionally under-represented populations.
II. COLLABORATIVE PROGRAMS AND SERVICES

Minnesota State and the University of Minnesota share an obligation to increase options for Minnesota citizens who desire postsecondary education and seek lifelong learning opportunities. The two systems are committed to supporting collaborative efforts to respond to the changing needs of metropolitan-area students, and to have a measurable impact on the outcomes of underserved students who wish to pursue various paths to postsecondary.

Analysis of program data from both systems illustrates that the academic programs of Minnesota State and the University of Minnesota complement one another, following their clearly differentiated missions. For example, there is a distinct difference in the levels of degrees awarded. Minnesota State dominates in degrees awarded at the associate level. By contrast, the University of Minnesota offers the largest number of post-baccalaureate degrees in Minnesota’s public higher education sector and invests considerable resources in research and public service, unique components of its statutory mission.

This section of the report describes in more detail the broad range of ways in which the two systems collaborate while minimizing program duplication. These efforts include:

- Academic Program Partnerships
- Minnesota Cooperative Admissions Program (MnCAP)
- Rochester Partnership
- Center for Allied Health Programs and HealthForce Minnesota
- University of Minnesota Extension
- Library and Information Technology Resources
- e-Learning Initiatives
- Other Collaborative Initiatives

Academic Program Partnerships

During the past 16 years the number of formal academic collaborations and partnerships between the University of Minnesota and the colleges and universities of Minnesota State has grown from 60 to over 150 academic programs and services, including over 40 collaborative activities to share resources, knowledge, and strategies for advancing higher education across Minnesota.

Collaborative undergraduate programs between the University of Minnesota and Minnesota State are known as “2+2” agreements. These agreements allow students enrolled in one system to apply approved coursework toward completion of a degree at an institution in the other system. Applied baccalaureate programs allow students to build focused University of Minnesota baccalaureate programs based on approved community college coursework. In addition, collaboration between the two systems allows students to complete a limited number of University of Minnesota graduate and professional programs while in residence at colleges and universities in Minnesota State. Collaborative programs between the two systems are listed in Appendix A.
Minnesota Cooperative Admissions Program (MnCAP)

MnCAP is a cooperative arrangement between the University of Minnesota–Twin Cities that provides access to the University of Minnesota for students wishing to transfer from one of the participating metro-area community colleges. MnCAP began as a pilot program in 2000 with three Metro Alliance community colleges and the University’s College of Liberal Arts. Since its inception, MnCAP has grown to include the seven metropolitan area community colleges (Anoka-Ramsey Community College, Century College, Inver Hills Community College, Minneapolis Community & Technical College, Normandale Community College, North Hennepin Community College, Saint Paul College) and six undergraduate colleges at the University of Minnesota–Twin Cities.

Students enrolled in MnCAP are guaranteed transfer admission to one of the participating University of Minnesota colleges and majors when they meet certain conditions. Students enrolling in this program work closely with dedicated staff at the community colleges and the University of Minnesota Office of Admissions to define the specific conditions for transfer.

Rochester Partnership

In 2006, the University of Minnesota–Rochester (UMR) became the fifth campus of the University system. As a campus, UMR is charged with providing high-quality academic, research, and public engagement programs emphasizing health sciences and related fields. UMR is focused on serving the economic and educational needs of southeastern Minnesota through complementary and cost-effective public and private partnerships across the region and state.

UCR Partners: The center known as University Center Rochester (UCR) was formally dissolved in 2015, however, the partnership with Rochester Community and Technical College (RCTC) and Winona State University (WSU) is still active. UMR continues to work with RCTC and WSU on education and community engagement. The UMR chancellor meets with RCTC and WSU leaders throughout the year to discuss educational planning and campus development and to explore opportunities to serve the region. UMR has a focused educational structure designed to not duplicate programs currently available and for which regional demand is satisfied.

UMR delivers a collaborative undergraduate degree program, the Bachelor of Science in Health Professions (BSHP), with the Mayo School of Health Sciences. This program creates pathways to licensures and certifications in specific health care professions. Students can prepare for admissions to the program at UMR or select Minnesota State.

RCTC delivers a variety of associate degrees (AS, AAS, AA) with many articulation agreements with Winona State through its Path to Purple programs. WSU delivers its doctoral nursing program, teacher licensure programs (undergraduate and graduate), business administration, accounting, computer science, and social work programs in Rochester. WSU has delivered educational opportunities, degree programs, and workforce development in Rochester since 1917, with renewed efforts underway to expand these efforts at the RCTC campus and in a new downtown location.

In addition to academic collaborations, UMR, RCTC, and WSU continue joint efforts in community outreach, marketing, and institutional research. Decisions on collaborative efforts are based on mutual
benefit, cost efficiencies, and impact on prospective or existing students. One example of a coordinated
effort is the Rochester Area Math Science Partnership (RAMSP), which provides PK–12 teachers with
the best available professional development opportunities in science and mathematics. The partnership
includes: Mayo School; IBM-Rochester; Southeast Minnesota Cooperative, Workforce Development,
Inc.; 11 southeastern Minnesota PK–12 school districts; and UMR, WSU, and RCTC.

Together, UMR, RCTC and WSU actively participate in the community-based advocacy group Greater
Rochester Advocates for Universities and Colleges to promote innovative practices that leverage the
resources of public higher education resources to best serve students, employers, and the community.

Center for Allied Health Programs and HealthForce Minnesota

**Center for Allied Health Programs:** The Academic Health Center (AHC) at the University of
Minnesota developed the Center for Allied Health Programs in 2006 to address increasingly serious
workforce shortages of allied health professionals in Minnesota. The Center was designed to increase
workforce production in a financially sustainable model; coordinate the production of an allied health
workforce with the Minnesota State system to avoid duplication and more efficiently deploy resources;
collaborate with private health systems and leaders to educate students with current and specialized
skills; and produce the next generation of allied health professions researchers and faculty members.

The goal of the model is to develop a platform that is flexible, meets learner and workforce needs, has
multiple higher education and location access points, and is a collaboration of multiple private and
public partners. The Center is developing signature academic partnerships with learners and
communities, with health care and other industries, and with Minnesota State and other higher
education institutions. For more information, see www.cahp.umn.edu.

**HealthForce Minnesota:** HealthForce Minnesota is a collaborative partnership of education, industry,
and community that was created to increase the number and expand the diversity of healthcare
workers; to integrate health science education practice and research; and to build capacity for
education and industry to collaborate to enhance patient care.

The University of Minnesota medical laboratory sciences program established academic affiliations
with Minnesota State University–Mankato and St. Cloud State University to enable students to
complete their professional year of courses through the University of Minnesota MLS program. Each
year, 5–10 students from these Minnesota State schools complete the NAACLS-accredited U of M
MLS program, but receive their degree from their Minnesota State home school. MLS faculty and staff
have developed transfer guides that Minnesota State schools use to assist students as they prepare
for the MLS program and application process. For more information, see cahp.umn.edu/transfer-guides.

University of Minnesota medical laboratory sciences faculty and staff are also active participants in the
HealthForce Minnesota Clinical Laboratory Work Group, operated out of Winona State University.
Members throughout the state—including educators from the University of Minnesota, St. Cloud State
University, Winona State University, Saint Paul College, North Hennepin Community College and
employees from Allina, Fairview, Children’s of Minnesota, and Regions Hospital/Health Partners—
meet monthly to discuss issues that have an impact on workforce needs.
A Clinical Laboratory Workforce Summit was held in September 2015 to focus on clinical placement capacity. Planned by the HealthForce Minnesota Clinical Laboratory Workgroup, the summit featured faculty presentations and significant engagement from the University of Minnesota medical laboratory faculty. Another summit is now being planned for October 2017.

The Clinical Coordination Partnership (TCCP) was formed to enhance the nursing workforce development in Minnesota and Wisconsin by developing collaborative partnerships among educational programs and their clinical partners with a goal to maximize clinical rotation sites through scheduling coordination, student onboarding standardization, and faculty development. TCCP consortium members include nursing programs at the University of Minnesota, Minnesota State, Minnesota private colleges, and colleges/universities in Wisconsin, North Dakota, and South Dakota. Clinical partners include Allina Health system, Children’s Hospitals and Clinics, Fairview Health System, Essentia Health, HCMC, North Memorial, Park Nicollet, Mayo Clinic and Health System, Gunderson Health System, HealthPartners, HealthEast Care System, and many others. TCCP now has 52 education partners and 78 clinical partners.

TCCP is now a self-sustained membership-funded entity within HealthForce Minnesota. Education and clinical partners pay a membership fee to support its staffing, maintenance, and continued development. The University of Minnesota and Minnesota State have representatives on TCCP’s Chair Committee, Advisory Committee, and Advanced Practice Practitioner Committee.

Other Collaborations: The Healthcare Education Industry Partnership (HEIP) Council has been in existence since 1998. It is staffed by HealthForce Minnesota and meets quarterly to discuss and plan for strategic workforce and education issues across the state. The University of Minnesota is an active member of this group.

In 2013, Minnesota State was charged with holding a mental health summit and developing a mental health workforce development plan for the state (SF 1236). A steering committee was formed and included several representatives from the University of Minnesota in fields including nursing, psychology, and psychiatry. This steering committee continues to meet to monitor and facilitate progress related to the recommendations.

In 2015, HealthForce MN revived the Minnesota Simulation for Healthcare Education Partnerships to promote simulation excellence by providing evidenced-based resources and support for educators. MnSHEP fosters academic/practice partnerships to promote research and provide collaborative learning opportunities in simulation. There are 300 members including industry partners, private and public colleges, and university educators. MnSHEP has an advisory board with representation from the University of Minnesota Nursing Program.

In October 2016, a jointly-planned Healthcare Summit was held at UMR. Planning was led by Minnesota State, HealthForce, and UMN administrators. The event featured presentations by UMR and WSU and included representatives from both systems who actively engaged in discussion about future collaboration.
Middle School and High School Youth Outreach Programming
UMR partnered and supported HealthForce Minnesota in its second annual Girls Scouts ConnectZ Scrubs Camp day on May 18, 2016 at the RCTC/WSU-R campus. Girls ConnectZ Day is a partnership between Girl Scouts of River Valley and HealthForce Minnesota. Through this partnership, middle and high school girls who are registered for their Girls ConnectZ program are offered opportunities to explore careers in healthcare on various college and university campuses. Girls must identify as a girl of color and/or eligible for free/reduced meals at their school in order to participate. UMR faculty and staff provided hands-on learning sessions for students attending this event.

U of M Duluth partnered with Fond du Lac Tribal and Community College to host the first high school Scrubs Camp in the Duluth/Cloquet region. UMD collaborated by hosting the students for a half-day onsite visit.

U of M Twin Cities partners with various Scrubs Camps sending their representatives to facilitate a variety of hands-on sessions in order to stimulate middle school and high school students’ interest in pursuing a career in health care. They have sent representatives from STEM Cell Institute, Medical Devices Center, College of Veterinary Medicine, College of Pharmacy, and School of Dentistry.

Current discussions are happening with UMR to work collaboratively to create opportunities for underrepresented youth and create a collaborative pipeline for our higher education programs in the southeast Minnesota region.

University of Minnesota Extension
University of Minnesota Extension collaborates with Minnesota State across the state in areas such as agriculture, children and youth, strengthening communities, and economic development.

Faculty and staff from Minnesota State work with University of Minnesota extension educators to deliver an array of education and training programs. For instance, educators from both systems provide information and education for students enrolled in the Minnesota Farm Business Management Education and other college and university agriculture, food, and natural resource programs. Likewise, educators from both systems provide professional and continuing education for faculty and staff. System leaders also cooperate in developing strategies to address the economic and community development opportunities and challenges facing Minnesotans. For more information, see www.extension.umn.edu and www.fbm.mnscu.edu.

Library and Information Technology
MnLINK: In 2002, the University of Minnesota and the Minnesota State jointly implemented MnLINK, a partnership among academic, public, and K–12 libraries statewide, funded through Minnesota’s Office of Higher Education. MnLINK enables access to library catalogs and the sharing of library resources throughout the state. Students and faculty have better access to the collections of both higher education systems using the online system. For more information: www.mnlink.org.
Minitex Library Information Network (Minitex): Based within the University of Minnesota’s University Libraries, Minitex provides significant resource-sharing capabilities to some 1,500 libraries within the state. Minitex facilitates the delivery of books and journal articles to patrons statewide. The majority of Minnesota State requests (~50,000 annually) are filled from the collections of the University of Minnesota Libraries. Most requests for journal articles are scanned and electronically delivered to the desktops of students and faculty, sometimes within hours. Book loans are delivered overnight through the Minitex delivery system.

Minitex also licenses electronic content, often drawing on the base agreements for the University of Minnesota (notable collections in health sciences and scientific areas). Minnesota State faculty and students benefit by inclusion in these agreements, providing access to significant electronic content. For more information, see www.minitex.umn.edu.

Minnesota Digital Library (MDL): The Minnesota Digital Library is a collaborative undertaking initiated by the University of Minnesota and Minnesota State four-year institution libraries. MDL provides infrastructure and support for digitization of library, museum, and historical society collections. Administratively managed by Minitex, the MDL has digitized and delivered over 280,000 images, documents, and maps contributed by 181 cultural heritage institutions across Minnesota. MDL has further partnered with K–12 teachers to develop multimedia educational modules and programming based on these resources. For more information, see http://reflections.mndigital.org

In 2013, MDL was selected as a hub for the Digital Public Library of America (DPLA), a national network of state and regional digital libraries in the United States. The DPLA brings together digitized and born-digital content from across the country into a single access point for end users, and provides an open platform for developers. In addition to the cultural heritage organizations contributing content to MDL, additional organizations such as Minnesota Public Radio, Minnesota Historical Society, and Minneapolis Institute of Arts have contributed metadata via MDL to DPLA, enabling broad access to their digital resources. For more information, see http://dp.la/

Professional Development: The University of Minnesota Libraries and Minitex sponsor numerous professional development events for librarians and library staff in the state, including those from University of Minnesota and Minnesota State. Over 7,000 academics, librarians, and/or students attended a wide range of conferences as well as workshops targeted for individual institutions in Minnesota State.

eLearning

Minnesota Learning Commons (MnLC): The majority of Minnesota State / U of M e-learning collaboration occurs through the MnLC, a joint powers agreement between the University of Minnesota, Minnesota State, and the Minnesota Department of Education. MnLC’s mission focuses on supporting “public educators teaching in online, blended, and digital learning environments.” By identifying strategies where Minnesota’s public education sector can work on issues that could be better accomplished together than alone, the MnLC provides greater benefit, and better use of limited resources to lower costs and reach broader audiences. The MnLC website (mnlearningcommons.org/)
provides access to professional development and networking opportunities for faculty and instructional support staff.

Specific MnLC programs and services include:

- The **Minnesota eLearning Summit**, now in its fourteenth year, is the premier gathering place for college, university, and K-12 educators and innovators in Minnesota who are committed to effective online and blended learning. In 2016, over 375 registered for the Summit to participate in sessions from their colleagues and hear keynoters Dr. Randy Bass (Georgetown University) and Dr. Marie Norman (University of Pittsburgh Medical Center). The 2017 eLearning Summit is scheduled for August 2-3 in the Twin Cities.

- **Quality Matters (QM):** QM is a national faculty-centered peer review process designed to certify the quality of online courses. Based on best practices and rigorous research, QM provides rubrics, national course certifications, and training to faculty who are teaching online or hybrid courses. This program is paid for and coordinated jointly by Minnesota State and the University of Minnesota. A Quality and Best Practices Special Interest Group was organized this year to provide additional collaboration opportunities.

- **Web Accessibility** – the Special Interest Group provides members and opportunity to share updates, issues of concern, effective practices, professional development opportunities, and resource materials from SIG members and post on the MnLC website. Minnesota State and the U of M are exploring possible opportunities for a joint professional development conference in the near future.

- **MnLC Special Interest Groups** – Additional groups include *Open Education Resources (OER)* that brings together those working on OER and affordable content solutions with the goal of sharing best practices and collaborative opportunities; *Digital Literacy* addressing critical competencies needed by 21st century learners; and *Innovation* including topics such as competency-based education, virtual reality/augmented reality, micro-credentialing, and learning analytics.

- **Federal Regulatory Compliance for Online Learning:** Minnesota State and the University of Minnesota Provost’s Office, through MnLC are working with the Minnesota Office of Higher Education in the State Authorization Reciprocity Agreement (SARA) to promote multi-state regulatory compliance with distance education regulations. By working jointly under SARA, both Minnesota State and the U of M have saved significant amounts of money and staff time. Currently all five University of Minnesota campuses and 23 of the Minnesota State colleges and universities have joined SARA.

- **Monthly Webinars for Joint Staff/Faculty Development** – Over the last year, the MnLC continued the monthly “Best of Summit” webinars on a wide variety of topics from UMTC’s “What Does Recent Pedagogical Research Tell Us About eLearning Good Practice?” to Minnesota State University Moorhead’s "10 Steps Closer to an Accessible Course."

- **Annual Report of Public Online Learning in Minnesota** - The MnLC partners also collaborate on the annual report summarizing the state of online offerings in Minnesota’s public education institutions (higher ed and K-12).
In addition to the MnLC, the U of M and Minnesota State partner in these eLearning related areas:

- **Serving transfer students with Transferology** - The University of Minnesota and Minnesota State collaborate on support for Transferology, the web-based system that provides students accurate, up-to-date information about how courses will transfer and apply to a degree program at higher education institutions.

- **The Minnesota Eligible Training Provider List** – As part of the new DEED database of the Career and Education Explorer Project, both the U of M and Minnesota State are working closely with DEED to provide non-credit and credit-based data feeds so that the WorkForce Centers will have the most comprehensive listings of credit-based and non-credit courses and programs and provide targeted educational opportunities for displaced workers.

**Learning Network of Minnesota:** All Minnesota State and University of Minnesota institutions are members of one of the six Learning Network of Minnesota (LNM) regions. Developed as a result of Legislative action in 1993, the LNM supports core network and online learning services infrastructure across the state. These services include video conferencing, web conferencing, and streaming media and voice communications. In addition, the LNM funds network bandwidth to many campuses. Each region is governed by a board of directors including representatives from corresponding institutions. There is also a statewide Learning Network of Minnesota board of directors that has Minnesota State and University of Minnesota system and institutional representation. Currently the Learning Network of Minnesota has partnered with the University of Minnesota and Minnesota State to implement a new cloud-based media streaming solution for institutions and faculty.

**Other Collaborative Initiatives**

**Healthy Campus Initiative:** Minnesota State and the University of Minnesota continue to work together to advance the goals of the Healthy Campus Initiative, developed by the University of Minnesota Boynton Health Service (BHS) in 2004 with initial funding from BlueCross and BlueShield of Minnesota and ClearWay Minnesota. As part of this collaboration, the University of Minnesota and Minnesota State together administer the College Student Health Survey, a comprehensive survey of undergraduate and graduate students across Minnesota. In 2013, 25 campuses participated in the survey and received extensive reports about the health status of their student population. The Minnesota State system office also funded an additional focus for this study that gathered data on the specific health-related issues of students who are veterans; a special veterans report was produced for each year the survey was conducted. In 2015, many of the Minnesota State institutions participated in the updated version of the College Student Health Survey. This collaboration between Minnesota State and BHS has led to the creation of new policies, programs, and services aimed at improving the health of students, staff, and faculty that are part of the Minnesota State and University of Minnesota systems.

**North Star STEM Alliance:** The North Star STEM Alliance is a partnership of 14 higher education institutions, including the University of Minnesota and six Minnesota State, as well as the Science Museum of Minnesota, Minnesota High Tech Association, and the Minnesota Minority Education Partnership. Among the goals of the Alliance are to double the number of underrepresented students receiving bachelor's degrees in science, technology, engineering, and math among partner institutions in a five-year period and generally encourage greater diversity and inclusion on partner campuses. The North Star STEM Alliance supports these goals through community building conferences, peer-to-peer learning, undergraduate research opportunities, programs to help students successfully bridge to
college and university-level STEM programs, industry internships, professional development, and publicity of current research in STEM fields.

**MCTC Student Health Clinic:** The University of Minnesota Boynton Health Service has operated a Minneapolis Community and Technical College (MCTC) Student Health Clinic since November 2009. The clinic is operated under a Minnesota State service agreement, which was extended through an RFP process through fiscal year 2018. Funded through the MCTC Student Life Fee with in-kind support by MCTC administration for facilities, maintenance, and capital equipment, the MCTC Student Health Clinic provides primary care, mental health, and laboratory and radiology services during the academic year, with recent expansion for limited service during the summer. The clinic serves over 900 unique students per year and provides over 1,700 visits. Clinical and public health staff from Boynton Health Service are also engaged with MCTC staff to coordinate campus health and wellness initiatives.

**Oral Health Practitioner Initiatives:** Concerns about serious gaps in dental care access and increasing costs prompted the University of Minnesota School of Dentistry and Minnesota State to consider proposing programs to educate “mid-level” dental providers—dental professionals new to the continental United States but recognized members of dental care teams in many other industrialized nations.

A delegation—including faculty and administrators from the University of Minnesota School of Dentistry, dentistry practitioners, and representatives from Minnesota State—visited dental therapy programs in Canada, New Zealand, and England to gather information about best educational practices and how mid-level dental providers can be effectively deployed.

The University of Minnesota School Of Dentistry has implemented a bachelor of science in dental therapy (BSDT) and a master’s of dental therapy (MDT). Graduates of these programs perform dental assessments and treatments that go beyond those of dental hygienists or dental assistants, but are still more limited in scope than those provided by dentists.

In 2006, Minnesota State approved a master’s of science in oral health practice, offered by Metropolitan State University. The program admits baccalaureate-prepared dental hygienists with significant clinical experience and prepares them to deliver a carefully designed scope of practice in a range of underserved settings. The practice model is team-centered and governed by detailed collaborative management agreements with practicing Minnesota dentists. These programs will help to provide professionals to work with underserved populations within Minnesota.

The University of Minnesota School of Dentistry and Minnesota State are partnering to develop a common practice model between the two institutions and for the State of Minnesota. Both programs will be focused on educating graduates to practice as an advanced dental therapist, which is the top of the legislatively approved practice model. The two systems are also collaborating on revising and enhancing their educational model to provide the most cost effective, trained practitioner with the best chance of long-term employment.

Minnesota State and University of Minnesota School of Dentistry are working with dental providers, health plans and government agencies—including Department of Human Services, Minnesota Department of Health, and Hennepin County—and other counties across the state to propose a first-in-
the-nation, outcomes-based public health payment system for oral health. This system is being proposed for consideration and funding in the next legislative session. This effort is part of ongoing leadership coordination between the oral health education programs and safety net providers in the state of Minnesota.

**Hibbing Community College Dental Clinic:** The Hibbing Community College Dental Clinic, a community-based dental clinic in Northeast Minnesota, is a partnership among the University of Minnesota School of Dentistry, Hibbing Community College, and the city of Hibbing. The clinic has significantly increased access to dental care for uninsured, underserved, and public program patients in the ten-county region of northeast Minnesota, while providing a critical outreach experience for dental and dental hygiene students. Since its opening in 2002, nearly 135,000 patient procedures have been provided and over 1,100 students have benefitted from the program.

**Wellness Courses:** Two online wellness courses developed by the University of Minnesota are taught on Minnesota State campuses. The one-credit courses are among several developed by the Rothenberger Institute in the University of Minnesota School of Public Health, which collaborates with Minnesota State on curriculum sharing, faculty development, and online course site development. The course “Alcohol and College Life” has been offered since 2006 at Inver Hills Community College. The course is also offered at Vermilion Community College and required of all Associate of Arts degree-seeking students. Inver Hills also offers the course “Sleep, Eat & Exercise.” Anoka Ramsey Community College offers a customized course combining lesson content from both programs and it also used as a required online textbook for a four-credit wellness course, “HPER 1120: Wellness for Life.”
III. PROGRAM DUPLICATION

There is limited duplication of academic programs offered in the Twin Cities metropolitan area (see Tables 1 and 2). The University offers no associate degrees in the metropolitan area, while Minnesota State offers six doctoral degrees and no first professional degrees in the metropolitan area. A comparison of baccalaureate and graduate programs offered by the University of Minnesota–Twin Cities, Metropolitan State University, and other state universities offering programs in the Twin Cities reveals an apparent overlap of 42 programs (out of a total of 77 baccalaureate, master’s and doctorate degree programs offered by state universities, and 440 similar degree programs at the University of Minnesota). However, the following must be considered in regard to instances of duplication:

- Overlap may be in name only, and not substantively duplicative program offerings;
- In areas such as business- and health-related fields, sufficient need exists in the metropolitan area for degrees to be offered by both systems; and
- The two systems serve different student populations both in selectivity and patterns of enrollment (full-time vs. part-time) that lead to variances in programs and types of delivery.

The distribution of specific degree programs and patterns of enrollment for Metro Alliance institutions and the University of Minnesota’s Twin Cities campus follows statewide patterns. Analysis reveals appropriate distribution among public providers for high-demand areas, such as business management, education, and nursing, as well as appropriate specializations. For example, Minnesota State offers all of the degree programs in law enforcement, while the University of Minnesota offers all of the medical degrees.

Conclusion

The two systems monitor and evaluate their own programs for possible duplication and overlap and are attentive to the distinctive missions and programmatic strengths of their respective institutions. The diverse and growing needs of the Twin Cities metropolitan area, combined with the need for an educated workforce, require the two systems to draw on the capacity of all the institutions to provide local and flexible access to academic programs. Collaboration between the two systems supports responsiveness and effective use of resources.
**IV. CREDIT TRANSFER REVIEW**

Effective credit transfer policies are an essential component of collaboration between the Minnesota State and the University of Minnesota. Both systems are committed to students graduating in a timely way and agree that transfer, by itself, does not delay graduation. In other words, transfer students are not automatically disadvantaged in time-to-degree; however, successful transfer depends on careful planning and consultation with transfer advisors.

**Policies and Practices**

Improved awareness and understanding of transfer policy have led to a transfer-friendly environment wherein prior coursework is evaluated in the most generous terms consistent with program requirements. The University of Minnesota and Minnesota State offer significant transfer credit for coursework taken at other regionally accredited institutions. Broad policy guidelines for receiving transfer credits are as follows:

- Transfer decisions are made on the basis of quality, comparability and applicability of the learning experience to the student’s educational goals (Joint Statement on Transfer and Award of Credit, 2001). The Higher Learning Commission of the North Central Association of Colleges and Schools accredits the University of Minnesota and all of the Minnesota State campuses (Policy and Good Practice in the Award and Transfer of Credit, HLC, 1999). Transfer among the Minnesota State campuses and the University of Minnesota is grounded in this common regional accreditation.

- Students are given the benefit of the doubt, when possible, in transfer situations. Institutions consider whether or not the coursework is comparable to coursework they offer and whether the coursework is part of the student’s selected program. Courses are evaluated by such factors as learning outcomes, course level, course syllabus or outline, and texts used.

- Institutions also consider the applicability of the coursework for meeting the requirements of degrees, diplomas, or certificates.

The basic principle is that “like transfers to like.” At the extreme end of the spectrum, courses in a technical program may not be appropriate for inclusion in a baccalaureate degree, even if it is offered by a regionally accredited school. The reverse is also the case—liberal arts coursework earned toward a baccalaureate degree may not be incorporated in technical programs if it is not required. This principle is important in ensuring that students who receive degrees, diplomas, and certificates from either system are doing so by completing coursework that is appropriate to their program or major, and ensures high quality education.

**Cooperative Transfer Programs**

Minnesota State and the University of Minnesota have established and improved cooperative inter-system transfer programs, including articulated transfer standards, a transfer curriculum, and a transfer specialists’ network. Since 1991, when the two systems submitted a joint plan and report to the Legislature, *Progress in Improving Student Transfer*, transfer across systems throughout the state has improved greatly. The following summarizes several key transfer initiatives.
Minnesota Transfer Curriculum (MnTC):
In an effort to improve the transfer of courses and credits among Minnesota’s public higher education institutions, the four existing higher education entities (technical college system, community college system, state university system, and University of Minnesota) met and established the Minnesota Transfer Curriculum (MnTC) in 1994. The original agreement stipulated that completion of the entire MnTC “package” of 10 goal areas, when noted on a student’s transcript, would be exempt from lower-division general education requirements at any Minnesota public institution to which they transfer unless there are also specific major-related course or graduation requirements.

At that time, only the community colleges, state universities, and the University of Minnesota offered general education courses in the MnTC, so standard practice typically did not accommodate the transfer of general education credits from technical colleges to the Minnesota State institutions or to the University of Minnesota. The 2001 legislature incorporated general education transfer language in the Education Omnibus Bill (Special Session S.F. 11) so that courses from technical colleges were initially submitted to the Minnesota State system office for peer faculty review and recommendation for inclusion in the Minnesota Transfer Curriculum in 2002–2003. Since then, each technical college’s Academic and Standards Council reviews courses for inclusion in the MnTC and determines its college’s Minnesota Transfer Curriculum requirements.

The 2001 legislation also required acceptance of Minnesota Transfer Curriculum courses and goal areas (sequence of requirements), in addition to the entire 10 goal “package” among Minnesota State. Transfer of MnTC course goal areas and completed goal areas are those met per the sending college or university. Appropriate coursework completed at the colleges and universities of Minnesota State is accepted for transfer to the University of Minnesota when the entire Minnesota Transfer Curriculum is completed. The University of Minnesota reviews transfer courses individually for applicability to the University of Minnesota liberal education requirements if a student has not completed the entire Minnesota Transfer Curriculum prior to transfer.

The MnTC continues to provide a framework within which each public institution in the state defines its lower-division general education requirements. Up to now, this process has required students to request this notation, but since October 2014, registrars at Minnesota State institutions have had the ability to electronically find students who have completed the Minnesota Transfer Curriculum and immediately add the notation of completion on the student’s transcript. The notation shows on the top left of the transcript, making it more prominent than it was previously. This enhancement promotes degree completion and lessens the chance that students take additional, unnecessary courses after they transfer. The MnTC agreement works well for students transferring to public four-year institutions from community colleges and consolidated community and technical colleges, and a few private and out-of-state colleges also honor it.

About 4,000 students each year transfer between the University of Minnesota and state colleges. Surveys of students who have transferred indicate satisfaction is highest when the entire MnTC is completed prior to transfer. Some students begin at a two-year college and transfer to the University of Minnesota to complete a baccalaureate degree, and some students who begin at the University of Minnesota decide to transfer to a Minnesota State college or university. Reasons for transfer include
program offerings, and economic, geographical, work- or family-related concerns. The Minnesota Transfer Curriculum provides a framework for all of these transfer patterns since students transfer in all directions.

Conversations have begun between Minnesota State and the University of Minnesota to review the Minnesota Transfer Curriculum and make enhancements. Goal area and credit requirements will be reviewed.

**Transfer Resources:** The Minnesota Transfer Website ([www.mntransfer.org](http://www.mntransfer.org)) provides comprehensive transfer information to students, parents, high school counselors, faculty and staff of Minnesota State, the University of Minnesota and others about transfer between public and private colleges and universities. The website has developed into a highly useful tool for potential students, enrolled students, and staff and faculty at the secondary and postsecondary levels. The site offers access to college and university transfer specialists, transfer action plans, accreditation information, transfer profiles, transfer websites, transfer guides, articulation agreements, a description of the Minnesota Transfer Curriculum, access to course outlines, and much more. The site has received an average of 4,962 users each month; page views average 18,175 per month over the past year. MnTransfer.org is currently being redesigned to improve the information and online tools provided to assist students with transfer, including a more efficient way to develop articulation agreements.

One useful tool on the site is Transferology, which is supported jointly by the University of Minnesota and Minnesota State. Students contemplating transfer may see how their coursework transfers to any institution within the Transferology network for evaluation against that institution’s academic programs where that feature exists. Students can see how their courses transfer into any program offered at any system institution, and can see course equivalencies at system institutions and at the University of Minnesota (or at any college that subscribes to Transferology). Students at Minnesota State can log into their eServices account and instantly upload all courses they have taken at any Minnesota State campus.

Transferology runs on data tables built using Degree Audit Reporting System (DARS) software to advise students about their progress toward program completion and to process transfer evaluations and is also used by staff at Minnesota State and the University of Minnesota. The University of Minnesota has used DARS since 1989, while Minnesota State started system-wide implementation in 1999. For more information, see [www.dars.mntransfer.org](http://www.dars.mntransfer.org).

The MnTransfer.org site also houses information about Minnesota State, the University of Minnesota, and other private and out-of-state colleges and universities, as well as a description of the University of Minnesota liberal education requirements and University of Minnesota MnCAP program. The MnCAP program guarantees admission to select majors if criteria is met.

Complementing the MnTransfer.org website are numerous publications produced by Minnesota State and the University of Minnesota. The Minnesota State Viewbook has a page that summarizes information about transfer and describes the purpose of various associate degrees. This viewbook is distributed at the annual Minnesota State Fair and college fairs to prospective students. Each Minnesota State college and university website is also required to have a transfer page accessible from the homepage with transfer information and links to Transferology and MnTransfer.org.
admission requirements, transfer policies, MnTC information, links to transfer specialists, transfer guides, and articulation agreements are some of the information that is required.

Each University of Minnesota campus provides detailed information for transfer students. The University of Minnesota–Twin Cities site leads students through the application process, tells students what to expect after they have been admitted, and provides information on related topics such as financial aid, honors programs, housing, transportation, and extracurricular activities. See: www.admissions.tc.umn.edu/admissioninfo/trans.html.

The University of Minnesota Transfer Student Guide (transfer.class.umn.edu/) provides information for students transferring into the College of Liberal Arts and has pathways depending on where students are transferring from. Other resources, such as transfer guides, tools for how courses transfer, and connections to advisors are also provided.

These websites link students to transfer specialists and other important contact points on each campus and within specific colleges, and also link to the Transferology website. Each of the colleges on the Twin Cities campus includes specific information for prospective transfer students wishing to transfer into that college on its website, as well as contact information for transfer specialists in the college.

Transfer student information for other University of Minnesota campuses are:

- Duluth: www.d.umn.edu/undergraduate-admissions/apply/transfer-students
- Morris: www.admissions.morris.umn.edu/transfer/
- Crookston: https://www.crk.umn.edu/admissions/prospective-transfer-students
- Rochester: www.r.umn.edu/admissions/transfer

**Transfer Specialists’ Network:** Every campus has one or more designated transfer specialist who can answer students’ questions about transfer. These transfer specialists connect in various ways to discuss issues and resolve problems. An annual Transfer Specialist Conference hosted by Minnesota State is attended by over 120 transfer specialists from the University of Minnesota, Minnesota State, and private and out-of-state colleges and universities. Minnesota State also conducts an annual Transfer Orientation for new transfer specialists, as well as several regional transfer meetings to keep transfer specialists up-to-date. A DARS/Transferology conference is held annually, with DARS/Transferology training offered throughout the year. Transfer tips are sent to the group periodically, and two transfer listservs allow transfer specialists to ask questions and share transfer information. Because Minnesota State consists of both two- and four-year institutions, transfer groups meet regularly to support transfer. These groups include the Transfer Oversight Committee comprised of faculty, transfer specialists, administrators, students, and system office staff; and the Transfer Advisory Group comprised of transfer specialists.

**Lumina Foundation Grant:** Minnesota State engages in a process to award associate of arts (AA) degrees through reverse transfer. Since students transfer to other colleges and universities without having completed the associate of arts degree, the reverse transfer process allows them to transfer courses back from their current institution and complete the AA degree at a prior college. As of June 2016, 1,998 AA degrees were awarded through this process including students from the University of Minnesota.
**Electronic Transcripts:** SPEEDE (Standardization of Postsecondary Education Electronic Data Exchange) and ExPRESS (Exchange of Permanent Records Electronically for Students and Schools) provide electronic exchange of official elementary, high school, and postsecondary student transcripts between and among the University of Minnesota and Minnesota State. Electronic transcript exchange among Minnesota State began fall 2009.

Postsecondary electronic transcript exchange between the University of Minnesota and Minnesota State has not yet begun.

**Conclusion**

Transfer between the University of Minnesota and Minnesota State works better than ever, and ongoing improvements continue be developed. The two systems continue to evaluate and manage transfer so that it meets student needs and supports program integrity.
V. COLLEGE READINESS
AND UNDER-PREPARED STUDENTS

Minnesota State and the University of Minnesota continue to focus on the transition of students into postsecondary education. Initiatives include efforts to define college readiness in English, mathematics, the sciences, and other areas. The challenge of increasingly underprepared students requires all Minnesota educational partners to seek collaborative solutions to prepare high school graduates as well as many non-traditional learners for postsecondary learning.

P–20 Education Partnership

The University of Minnesota and Minnesota State are two of the founding members of the Minnesota P–20 Education Partnership, established in 2003 as the Minnesota P–16 Education Partnership. Now comprising 28 members, including four legislators, the partnership operates as a voluntary statewide collaboration focused on maximizing achievement of all students while promoting the efficient use of financial and human resources. The partnership is charged to develop policy and strategy recommendations that improve the quality of and access to education, improve college preparation and transitions, support teacher quality, and realign governance and administrative education structures.

In 2011, the Minnesota P–20 Education Partnership identified its agenda for the next 2–4 years with a singular focus on the achievement gap. The members believed that this was the most important educational issue facing the state for several reasons:

- Minnesota has one of the largest gaps in achievement between students of color/low-income students and their white middle- and upper-class peers.
- The demographic trends indicate all of the future growth in Minnesota’s population will be in communities of color.
- The economic vitality of the state depends on a highly educated and trained workforce: estimates are that by 2020, 74% of all jobs will require some postsecondary education.

The partnership reviewed best practices and transition issues from elementary to secondary education and from college to work and identified plans and strategies for reducing the achievement gap.

In 2013, the Minnesota Legislature passed “The World’s Best Workforce” legislation (Minn. Stat. § 120B.11), which required school districts to develop a plan to address five goals, including that all racial and economic achievement gaps between students are closed. While continuing its policy proposal development and advocacy for educational quality, the Minnesota P–20 Education Partnership aligned its work with this legislation by identifying support and direction for school districts to implement their “World’s Best Workforce” strategic plans.

In 2014, in response to legislation that was passed in the 2014 legislative session (Minn. Stat. § 127A.70), the Minnesota P–20 Education Partnership developed recommendations for a P–20 education system that increased students’ career and college readiness and opportunities for career pathways.
In 2015, the Minnesota P-20 Education Partnership continued to advance its work by also being responsive to 2015 legislation (Minn. Stat. § 135A.012), which identified a goal for postsecondary attainment for Minnesota residents. The legislation stated, “The number of Minnesota residents ages 25 to 44 years, who hold postsecondary degrees or certificates, should be increased to at least 70 percent by 2025.”

The P-20 Partnership has identified the postsecondary attainment goal as the primary work plan item for 2015-16, with the goals of: (a) informing the annual report on progress towards meeting or exceeding the goals by the Office of Higher Education, which is required to submit the first report by October 15, 2016; and (b) providing recommendations for funding and/or policy changes to the governor and the legislature for consideration at future legislative sessions.

The Partnership continues to be the sponsor and overseer of the Statewide Longitudinal Education Data System (SLEDS), which began in 2014 to link K–12 and higher education data for the first time (private college records are included, but private K–12 schools are not yet included). This tool greatly enhances the ability of policymakers to research factors in high school and postsecondary attainment. With data from early childhood through completion of postsecondary education and workforce entry, SLEDS provides data and feedback on how well Minnesota’s students are doing as they transition through the educational sectors and into the workplace. With a framework focused on pathways, progress, predictors, and performance, SLEDS provides information and analysis enabling policymakers and educators to make meaningful investments and policies. SLEDS will be a powerful tool in the quest to eliminate the achievement gap and increase the educational attainment of all Minnesotans.

One of the first reports from SLEDS revealed that the number of students who take remedial or developmental courses in college is lower than previously believed, at 28% (the change is due primarily to the inclusion of the private colleges). In addition, students taking developmental courses persist to the second year at rates similar to students who do not take such courses.

Postsecondary Enrollment Options (PSEO)

The Postsecondary Enrollment Options program, also known as PSEO, was created in 1985 to “promote rigorous educational pursuits and provide a wider variety of options for students.” Through PSEO, high school students receive high school and college/university credit for college or university courses that are completed through this program. Students can complete PSEO courses on a college or university campus taught by college or university faculty members and/or complete concurrent enrollment courses at the high school campus, taught by high school credentialed teachers that are mentored by college or university faculty members.

In the past few years, legislation has increased access to PSEO and concurrent enrollment among 9th and 10th grade students who meet eligibility requirements and afforded eligible 10th graders greater opportunities to participate in on-campus PSEO, specifically in career and technical education courses. In 2015, legislation was passed (Minn. Statute § 124D.09) that allowed for students participating in an early/middle college program at a state-approved secondary alternative learning program to have access to taking developmental education courses as PSEO students, in addition to college-level
courses that are within a well-defined pathway to earn a postsecondary degree or credential. These initiatives promote college readiness and early college credit opportunities and can be a strategy to assist in accelerating time to postsecondary degree completion.

In 2015, legislation passed (Minn. Statute § 124D.09) also required concurrent enrollment programs across the state to meet the accreditation standards of the National Alliance of Concurrent Enrollment Partnerships (NACEP) by 2020-2021 and for all concurrent enrollment programs to have local advisory boards. Additionally, concurrent enrollment programs must submit annual student survey results to the Minnesota Department of Education and Office of Higher Education for an annual legislative report. The legislature also allocated an additional two million dollars to school districts to support their participation in concurrent enrollment programs. These legislative requirements and funding support are encouraging the growth and sustainability of high-quality concurrent enrollment programs.

Educators from Minnesota State and the University of Minnesota campuses in Duluth, Crookston, and the Twin Cities meet bi-annually to share information about best practices and quality standards for concurrent enrollment or “college in the schools.” This collaboration was based on NACEP accreditation standards and has been formalized since 2004 as MnCEP (the Minnesota Concurrent Enrollment Partnership). This voluntary partnership provides institutional representatives with opportunities to learn about programs across Minnesota; identify and share best practices; develop communication tools to inform students, parents, and policymakers about concurrent enrollment programs; build and advance a shared research agenda focused on measuring the quality of concurrent enrollment programs; and identify opportunities for collaboration and improvement.

College Preparation

Starting in 1991 the University of Minnesota and Minnesota State admitted students to baccalaureate programs under a common set of preparation requirements. These included four years of English; three years each of mathematics, science, and social studies; two years of a single world language; and one year of visual or performing arts. This establishes a strong model for high school students and has increased preparation. The University of Minnesota Twin Cities campus added a fourth year of math for freshman admitted in fall 2015 and beyond, based on research finding that completion of four years of math enhances student success in college.

The new Statewide Longitudinal Education Data System (SLEDS) provides an easy way for Minnesota schools and parents to find information about the college going preparation, enrollment and graduation rates for students from Minnesota high schools. Both the University of Minnesota and the Minnesota State colleges contribute data directly to SLEDS and participate on the governance committees, greatly enhancing its viability and value.

An example of information available in SLEDS, and an important way students can become academically ready for college is to take rigorous, college-level courses in high school. Through the Minnesota Postsecondary Enrollment Program (PSEO), 11th and 12th grade high school students who meet certain eligibility requirements can enroll in college courses at campuses of the University of Minnesota and Minnesota State, including online courses. 10th graders can take career and technical education courses as well.
Both the University of Minnesota and Minnesota State offer concurrent enrollment courses which are designed by college professors, taught by high school teachers with the professors as coaches, and are open to students in 9th through 12th grade, again with academic eligibility requirements. These programs are generally called College in the Schools. They are distinct from Advanced Placement and International Baccalaureate courses because instead of having to take a specialized exam which has the possibility of earning college credit for the student, students earn simultaneous college and high school credits by completing the course successfully.

A major challenge was created in late 2015 by the regional higher education accreditation organization. The Higher Learning Commission adopted a clarification to its Assumed Practices indicating it will be enforcing a longstanding expectation that faculty teaching general education courses hold a master’s degree or higher in the discipline or subfield they teach. If the faculty member holds a master’s degree in another discipline the faculty member must have complete a minimum of 18 graduate credit hours in the discipline or subfield in which they teach. HLC policy allows the institution to use ‘tested experience’ as an equivalent to the academic credentials. This new enforcement applies to high school teachers in concurrent enrollment courses. Many high school teachers have master’s degrees but often in curriculum and instruction and not in the content area they teach. Both U of M and Minnesota State college staff have been evaluating teachers’ graduate-level education and professional development, and identifying and developing discipline-specific graduate-level coursework that is accessible for teachers.

The University of Minnesota’s College Readiness Consortium continues to support and expand use of a research-based school-wide college readiness program for grades 6-12. Ramp-Up to Readiness™ is designed to increase the number of students who graduate high school with the knowledge, skills and habits needed to obtain a degree or credential in higher education. The program supports and goes beyond academic readiness to include career, financial, admissions and social emotional readiness. Ramp-Up was used by over 105 Minnesota secondary schools during 2015-16. This is one way schools have implemented the 2013 legislative requirement that all students begin personal postsecondary plans, including career exploration, no later than 9th grade and review them annually.

The University of Minnesota’s College of Education and Human Development also offers the Minnesota Principals Academy, an executive development program to help school leaders prepare all students to obtain postsecondary degrees or credentials. Two cohorts are currently in process, in Thief River Falls and in the Twin Cities.

Because educational outcomes are highly influenced by factors outside of school, the University of Minnesota President Kaler has co-chaired Generation Next, the Minneapolis and Saint Paul collective impact initiative to increase student achievement from kindergarten readiness to college graduation. Chancellor Rosenstone is also a member of the Leadership Council. Faculty and staff from both institutions have been active in developing goals and action plans, as well as implementing those plans, to increase educational outcomes including high school graduation and postsecondary attainment.

In addition, the University of Minnesota hosted the first statewide convening on Educational Equity in Action in June 2016. The 640 participants represented a wide range of education leaders (both in and out of school) from early childhood to higher education, as well as nonprofits, policymakers and
community leaders. The convening included structured opportunities for participants to propose actions and consult with each other.

Many Minnesota State campuses have specific partnerships and programs with local high schools to increase college preparation for high school students. Such programs include administering the Accuplacer to high school students to determine college readiness benchmarks and providing targeted support in high school, delivering college preparatory courses at the high school, and offering college-readiness workshops or summer bridge programs. Specific examples include:

- Century College and Saint Paul College administers the Accuplacer at many Saint Paul public schools and partners with specific high schools to offer interventions for high school students who need additional support.
- High school students enrolled in the Inver Prep program can complete college preparatory courses in English or mathematics that prepare them to participate in the Inver Hill Community College’s InCollege concurrent enrollment program.
- At Hennepin Technical College, Minnesota West Community & Technical College, and Anoka-Ramsey Community College, students can take summer bridge programs that include developmental education courses to prepare them for college-level courses.
- Minnesota State University, Mankato offers the College Access Program (CAP) that provides a four-week summer residential program between high school and college and continues to support students during the regular school year.
- Minnesota State’s Center for College Readiness provides direct connections between college faculty and high school teachers and students to assess college readiness in writing, reading and math. High school students are able to submit assignments, which are evaluated by college teachers, to gain information on their college preparedness.

One partial measure of college readiness is ACT scores. The percentage of Minnesota high school graduates taking the ACT had steadily increased to 78% for the class of 2015, most of whom took the exam in 2014. In 2015 all Minnesota juniors were required to take the ACT, but the legislature rescinded that requirement for 2016. The percentage of students who reached all four ACT college ready benchmarks was 39% for the graduating class of 2015 (2016 reports are not out as of this writing), up from 36% in 2012.

Once in college, developmental and remedial courses help students develop basic academic skills needed for successful college-level study, generally in the areas of reading, writing, and mathematics. Developmental and remedial courses carry college credit for financial aid and athletic eligibility purposes, but not all may be used to meet requirements for a diploma, certificate, or degree. The Minnesota State colleges have the mission of providing open-door access to higher education. Consequently, a number of students admitted to the two-year colleges are not fully ready for college-level courses. Some students take remedial courses because they have not taken the necessary coursework in high school. Other students who have taken the necessary courses may still need to take one or more remedial or developmental courses, based on their placement exam results. Many of these individuals have been out of high school for a number of years and have forgotten skills they once had mastered. The Minnesota State colleges have the most extensive array of developmental courses and academic support services.
Most higher education institutions in Minnesota also provide academic support programs that do not generate credits. Learning centers, supplemental instruction, tutoring, and advising programs are examples of such academic support. Many students use these services, even if they do not need developmental courses.

**College Readiness Research**

Both systems have an extensive array of researchers developing new knowledge regarding effective instruction and preparation of students during their K-12 years, and remedial work in college. The SLEDS system provides new opportunities for research on student progress from early childhood into the workforce, including the high school to college transition. Over the last year researchers have been able to gain access to SLEDS data, under strict rules, for studies consistent with the SLEDS goals of identifying the most viable pathways for individuals in achieving successful outcomes in education and work, and informing decisions to support and improve education and workforce policy and practice.
IV. CONCLUSION

The 2017 postsecondary planning report reflects the long-term, ongoing, and effective working relationship between the two systems to develop and coordinate joint postsecondary programs in the Twin Cities and throughout Minnesota. In a period of substantial population growth and increased diversity in the metropolitan area, the two systems are aligned, each within their distinctive missions, to provide high-quality educational programs to citizens. Continued effective collaboration between Minnesota State and the University of Minnesota remains among the two systems’ highest priorities.
Appendix – Collaborative Academic Programs

Collaborative academic programs and services between the University of Minnesota and Minnesota State allow students in residence at one system’s institutions to apply approved coursework toward completion of a degree at the other system and leverage resources and services across the two systems. The following tables list over 150 such collaborative programs.

I. Request for Approval of New Academic Programs

- **Carlson School of Management (Twin Cities campus)—Create Doctor of Business Administration**

  The Carlson School of Management on the Twin Cities campus requests approval to create a Doctor of Business Administration (D.B.A.) degree, effective spring 2017. The proposed program will be delivered in collaboration with Tsinghua University, China. The proposed program is an applied, professional doctoral program directed at high-level executives working in China and the surrounding region. The D.B.A. will provide instruction beyond that of the M.B.A. to prepare participants to better face challenges and pursue opportunities in a complex, global business environment. The program is a part-time, cohort-based program for fully-employed individuals.

- **College of Science and Engineering (Twin Cities campus)—Create Post-baccalaureate certificate in Data Science and deliver online**

  The College of Science and Engineering on the Twin Cities campus requests approval to create a post-baccalaureate certificate in Data Science and deliver this program online, effective fall 2017. The proposed program provides students a strong foundation in the science of Big Data and its analysis by gathering in a single program the knowledge, expertise, and educational assets in data collection and management, data analytics, scalable data-driven pattern discovery, and the fundamental concepts behind these methods. The proposed program makes use of existing courses and resources.

- **Medical School (Twin Cities campus)—Create fellowship in Epilepsy**

  The Medical School on the Twin Cities campus requests approval to create a fellowship in Epilepsy, effective summer 2017. This one-year, fellowship program addresses the treatment and management of persons with epilepsy. Fellows will be able to diagnose and care for patients with epilepsy, including those with complications and diagnostic uncertainties. Training will take place primarily at the University of Minnesota Health clinics and hospital. The program will include clinical experience, as well as didactic, research, and teaching components.
College of Liberal Arts (Duluth campus)—Create undergraduate minor in Digital Writing, Literature and Design

The College of Liberal Arts on the Duluth campus requests approval to create an undergraduate minor in Digital Writing, Literature and Design, effective fall 2017. The proposed program offers students contemporary, online skills in writing, design, and visual analysis combined with an informed understanding of the culture, history, and critical interpretation of digital texts such as video games. This synthesis of the humanities with information technologies helps prepare students for a wide variety of professional pursuits in the networked, creative economy. The proposed program makes use of existing courses and resources.

Labovitz School of Business and Economics (Duluth campus)—Create undergraduate minor in Sustainable Business and Organization

The Labovitz School of Business and Economics the Duluth campus requests approval to create an undergraduate minor in Sustainable Business and Organization, effective fall 2017. The proposed program is an interdisciplinary minor that will provide students with an understanding of increasingly complex social, environmental, and governance issues related to sustainability. The minor is designed to complement any major in the college, and will prepare students for roles in large companies, startups, nonprofits, and government entities. The proposed program makes use of existing courses and resources.

The Morris Campus—Create B.A. degree and undergraduate minor in Medieval Studies

The Morris campus requests approval to create a new Bachelor of Arts (B.A.) degree and undergraduate minor in Medieval Studies, effective fall 2017. The interdisciplinary curriculum is comprised of topics in English, art history, history, French, math, philosophy, theatre, music, anthropology, German, and areas such as gender and religion with historical roots in ancient and Classical periods and Byzantine cultures. Students learn about the construction of belief, culture, and knowledge, while exploring implications and intersections of products of the medieval world across disciplinary, chronological, and geographical barriers. The proposed program makes use of existing courses and resources.

II. Request for Changes to Academic Programs

College of Education and Human Development (Twin Cities campus)—Create sub-plan in Prevention Science within the M.A. degree in Family Social Science

The College of Education and Human Development on the Twin Cities campus requests approval to create a new sub-plan in Prevention Science within the Master of Arts (M.A.) degree in Family Social Science, effective fall 2017. The new sub-plan will help students design and evaluate interventions, and utilize knowledge about them more strategically to reduce the incidence of unhealthy or maladaptive behavior, and to promote health and adaptive behavior in populations across the life span. The proposed change better reflects current curricular alignment and student demand.
Carlson School of Management (Twin Cities campus)—Deliver the Master of Business Taxation online

The Carlson School of Management on the Twin Cities campus requests approval to deliver the Master of Business Taxation (M.B.T.) online, effective fall 2017. Online delivery will provide greater access for students in this program, who come from diverse professional background.

College of Food, Agricultural and Natural Resource Sciences (Twin Cities campus)—Move the academic home of the M.S. degree in Agricultural Education from The College of Education and Human Development to the College of Food, Agricultural and Natural Resource Sciences

The College of Food, Agricultural and Natural Resource Sciences on the Twin Cities campus requests approval to move the academic home of the Master of Science (M.S.) degree in Agricultural Education from the College of Education and Human Development to the College of Food, Agricultural and Natural Resource Sciences, effective spring 2017. This academic home will better accommodate the needs and interests of students pursuing this degree.

The Morris Campus—Change the name of the B.A. degree and undergraduate minor in American Indian Studies to Native American and Indigenous Studies

The Morris campus requests approval to change the name of the Bachelor of Arts (B.A.) degree and undergraduate minor in American Indian Studies to Native American and Indigenous Studies, effective fall 2017. The proposed name change better reflects the academic content of the degree program and current terminology used in the field.

III. Request for Approval of Discontinued Academic Programs

Swenson College of Science and Engineering (Duluth campus)—Discontinue the B.S. degree in Cell and Molecular Biology

The Swenson College of Science and Engineering on the Duluth campus requests approval to discontinue the Bachelor of Science (B.S.) degree in Cell and Molecular Biology, effective spring 2021. Other curricular options exist that satisfy similar themes. Faculty and staff will support currently enrolled students toward degree completion.

College of Education and Human Service Professions (Duluth campus)—Discontinue the undergraduate certificate in Autism Spectrum Disorders

The College of Education and Human Service Professions on the Duluth campus requests approval to discontinue the undergraduate certificate in Autism Spectrum Disorders, effective summer 2017. Enrollments have been steadily declining, and other initiatives and curricular options exist that satisfy similar themes. Faculty and staff will support currently enrolled students toward degree completion.
College of Liberal Arts (Duluth campus)—Discontinue the undergraduate minor in Information Design

The College of Liberal Arts on the Duluth campus requests approval to discontinue the undergraduate minor in Information Design, effective spring 2020. The new undergraduate minor in Digital Writing, Literature and Design, listed above, satisfies similar themes. Faculty and staff will support currently enrolled students toward degree completion.
